## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

### NAMES AND LABELS

 Form elements do not have associated labels

▼

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

### CONTRAST

 Background and foreground colors do not have a sufficient contrast ratio.

▼

These are opportunities to improve the legibility of your content.
